

INSTALLATION INSTRUCTIONS

Part Number: KA-4524XD

SEE CATALOG FOR CURRENT APPLICATIONS

Congratulations, you have purchased the finest air filter that money can buy. With proper care, this filter will last 1 million miles or more. This filter can be used in a stock machine, with no modifications required. If any engine modifications have been made tuning/jetting adjustments may be required. There are special installation instructions, so please follow the procedures outlined below to ensure the K&N® Filtercharger® seals properly.

If you need any assistance please call 1-800-858-3333 to speak with a representative in our Customer Service Center before returning the product.

INSTALLATION:

1. Unlatch the 2 clips that secure the air filter frame. (Figs. 1 & 2)
2. Slide the air filter with frame out of the housing. (Fig. 3)
3. With the filter removed, remove any dirt or debris that may be present inside the housing.
4. Remove the filter frame from the OEM air filter. **NOTE: This will be used to install your new K&N air filter.** (Fig. 4)
5. Place the filter frame, removed in step 4, onto the new K&N air filter. (Fig. 5)
6. Slide the new K&N air filter, with frame, into the housing. (Fig. 6)
7. Ensure the filter frame tabs engage the holes inside the housing. (Fig. 7)
8. Latch the 2 clips to secure the filter in place. (Figs. 8 & 9)

NOTE: Clean an area on the air box and apply the “K&N Stop” decal. The decal will notify others who may be working on this vehicle that this is a washable/reuseable air filter.

THESE INSTRUCTIONS MUST BE FOLLOWED EVERY TIME THE FILTER IS SERVICED, OTHERWISE THE FILTER MAY NOT SEAL, AND DAMAGE TO THE ENGINE COULD RESULT.

CLEANING:

K&N Engineering, Inc., suggests checking the air filter element periodically for excessive dirt build-up. Depending on your driving conditions, we recommend cleaning your air filter every 50,000 miles. To clean and re-oil, purchase our filter Recharger® service kit, part number 99-5050 or 99-5000 and follow the easy instructions.
