

# INSTALLATION INSTRUCTIONS

## Part Number: TB-8025

SEE CATALOG FOR CURRENT APPLICATIONS

Congratulations, you have purchased the finest air filter that money can buy. With proper care, this filter will last 1 million miles or more. This filter can be used in a stock machine, with no modifications required. If any engine modifications have been made tuning/jetting adjustments may be required. There are special installation instructions, so please follow the procedures outlined below to ensure the K&N® Filtercharger® seals properly.

**If you need any assistance please call 1-800-858-3333 to speak with a representative in our Customer Service Center before returning the product.**

### INSTALLATION:

1. Remove the 7 screws from the air box and remove the lid. (Fig. 1)
2. Remove the stock air filter by lifting it out. (Fig. 2) With the filter removed, clean any dirt or debris that may be present inside the housing.
3. Due to inconsistencies in the air box, apply a small amount of the supplied sealing grease to the areas shown. (Fig. 3)
4. Also apply a small bead of sealing grease on both sides of the K&N filter as shown (Fig. 4)
5. Slide the K&N filter into the air box with the K&N logo facing the front of the bike. (Fig. 5)
6. Re-install the air box lid to complete installation. (Fig. 6) Note: Clean an area on the air box lid and apply the K&N "STOP" decal. The decal will notify others who may be working on this bike that this is a washable/reusable air filter.

**THESE INSTRUCTIONS MUST BE FOLLOWED EVERY TIME THE FILTER IS SERVICED, OTHERWISE THE FILTER MAY NOT SEAL, AND DAMAGE TO THE ENGINE COULD RESULT.**

### CLEANING:

K&N Engineering, Inc., suggests checking the air filter element periodically for excessive dirt build-up. Depending on your driving conditions, we recommend cleaning your air filter every 50,000 miles. To clean and re-oil, purchase our filter Recharger® service kit, part number 99-5050 or 99-5000 and follow the easy instructions.
