K&N® Cabin Air Filters replace your vehicle's stock cabin filter with a reusable design that cleans and freshens incoming air. They are electrostatically charged to grab and hold dust particles. K&N® cabin air filters help control odors while they help capture most mold, mildew, fungus, spores, bacteria and germs. When they get dirty they can be cleaned and reused and best of all, they come with a No-Hassle Lifetime Limited Warranty.

If you need any assistance please call 1-800-858-3333 to speak with a representative in our Customer Service Center before returning the product.

When applicable, refer to owner's manual for manufacturers installation/removal instructions. The following are helpful steps when replacing/servicing cabin air filter with K&N® cabin air filter.

1. Open the glove box and disconnect the cable located on the left side. (Figs. 1 - 3)
2. Push up on the surface above the tab to allow the glove box to drop down. (Figs. 4 - 5)
3. Squeeze the tabs on the sides of the cabin filter door to remove. (Fig. 6)
4. Remove the dirty cabin filter and clean any debris that may be present in the housing. (Fig. 7)
5. Install the K&N cabin air filter and reinstall the cabin filter door (Figs. 8 - 9).
6. Reverse steps 1 & 2 to complete the cabin filter installation. With the filter installed, clean an area near the filter door and apply the K&N Stop Decal. The decal will help notify others that this is a reusable cabin filter.
